About Us

The National Society of Black Engineers (NSBE), founded in 1975, aims to increase college access and retention among underrepresented groups. Our collective goal as an organization is to graduate 10,000 Black engineers annually by 2025. With over 30,000 members and 400+ chapters globally, NSBE is one of the largest student-run organizations in the U.S. Its members, including pre-college, collegiate, alumni, and professionals, adhere to the mission of “increasing the number of culturally responsible Black engineers who excel academically, succeed professionally, and positively impact the community.” NSBE fosters growth through leadership training, professional development, mentoring, community service, and scholarships.

With your donation we can achieve NSBE’s goal of supporting Black Engineers through their transition from students to professionals. On behalf of the Oregon State University (OSU) NSBE Chapter, it is with great pleasure that we invite you to partner with us to positively impact diversity in science, technology, engineering, and mathematics (STEM) careers!

This is an incredible opportunity for your organization to gain great advantages to maximize your visibility, recruit diverse talent, and support the aforementioned endeavors that encourage and reinforce women and men of color in their professional and communal pursuits.

Your donations will provide our chapter with resources that allow our members to:

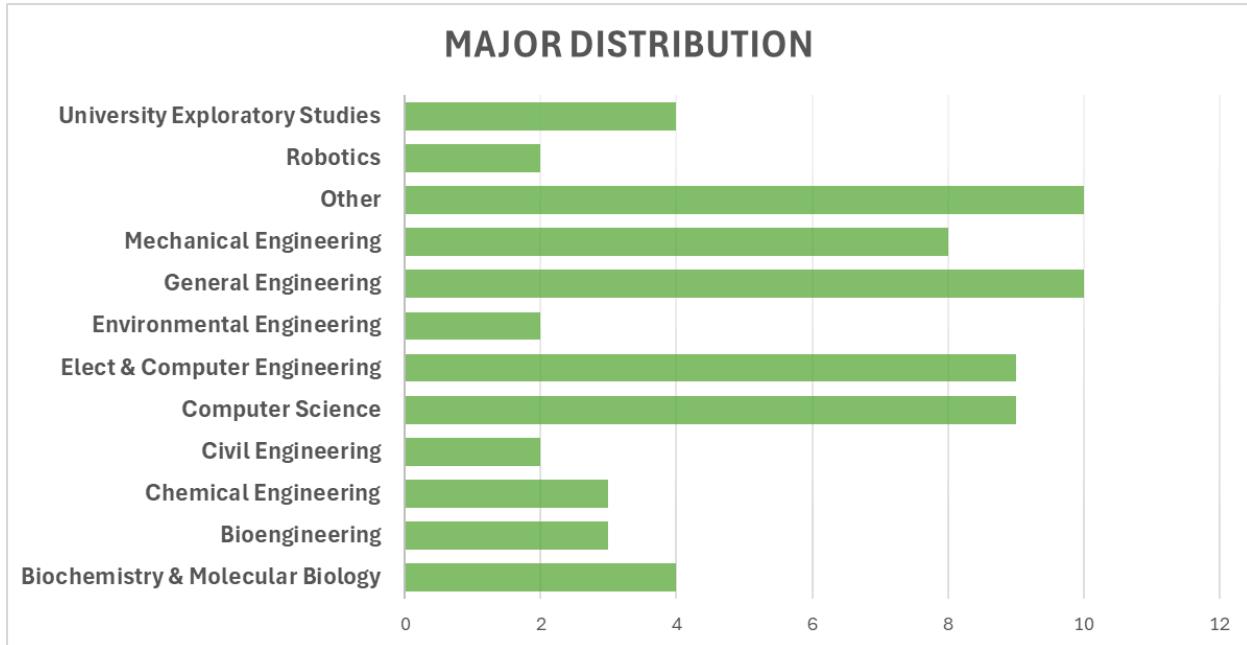

- Participate in local and nationwide conferences,
- Host various community outreach projects,
- Provide professional development for growth, exposure and networking opportunities.

We encourage you to review this Partnership Packet and discover how your exclusive contribution can enhance the field of engineering. We appreciate your consideration and look forward to partnering with you in the near future!

Programs

NSBE Membership Events

During the 2024-2025 academic year, NSBE at OSU is looking to empower our members in understanding themselves, their communication styles, and how they impact society as leaders. Through various programs, workshops, and community-building activities, we will encourage each member to do the following:

- Enhance their ability to make well-rounded decisions,
- Increase effective relationship management skills,
- Manage personal stress through improving social and self awareness.

Events each term will be centered around emotional intelligence within a specific theme. For example, Career in Fall, Community in Winter, and Personal Development in Spring. We believe this will increase membership participation and community collaboration. Additionally, we host a variety of fun and engaging events such as movie nights, crochet nights, and game nights to name a few. These practices not only uphold the Engineer Code of Ethics, but further enhance the NSBE mission statement. There are plenty of opportunities for your company to present at one of our meetings and/or engage in several NSBE events throughout the year.

NSBE Outreach

Our NSBE chapter is fully committed to making a positive impact on our community, especially in the lives of younger students aspiring toward higher education and careers in STEM. One of our signature initiatives includes hosting a school supply drive once per term. We collaborate closely with local teachers to identify and provide essential materials needed to enhance learning experiences within each classroom. We believe that every student deserves to have access to quality educational resources thus laying a magnetic foundation for their academic and professional future. OSU NSBE members are also actively engaged in STEM outreach events with local grade schools such as Lincoln Elementary.

Not only do we plan to inspire and nurture the next generation of engineers, we welcome other types of engineers such as graduate students, seasoned professionals and retirees to join us on our quest for captivating, outreach initiatives. Feel free to inquire about joining us for interactive workshops, hands-on activities, mentorship opportunities, and more. Your sponsorship and collaboration will directly contribute to the expansion and enrichment of these initiatives, enabling us to reach more people and make a profound impact on all of our journeys.

NSBE Conferences

The National Society of Black Engineers as an organization is composed of six regions. Each region hosts an annual conference, typically held in the fall, to foster connectivity between neighboring chapters. All regional members, including pre-collegiate students, are exposed to various opportunities in leadership-building, engagement with graduate schools, corporate-sponsored workshops, and networking.

National conventions are also huge network-building opportunities for us. Similar to regionals, the national convention expands our connection to national and international members, a larger scale career fair, and participation in various outreach activities. Events like these allow each generation of engineers to be inspired, motivated, and ready to make dynamic differences in the world.

With your sponsorship, our collegiate journey will become more enriching and beneficial in all aspects. Please feel free to reach out with questions or to discuss in detail how we can partner together.

Thank you for your ongoing support and solidarity,

Tai-Renée King
President: NSBE at OSU Chapter
